

Welcome to XML Symposium

Ron Zimmer

President & CEO CABA

- Who is CABA

- International Association for Smart Homes and Intelligent Buildings

- Events: Next Generation Buildings, Connected@Home, XML Symposium

- Why are we here?

- Industry is changing and IBs are less “out there”

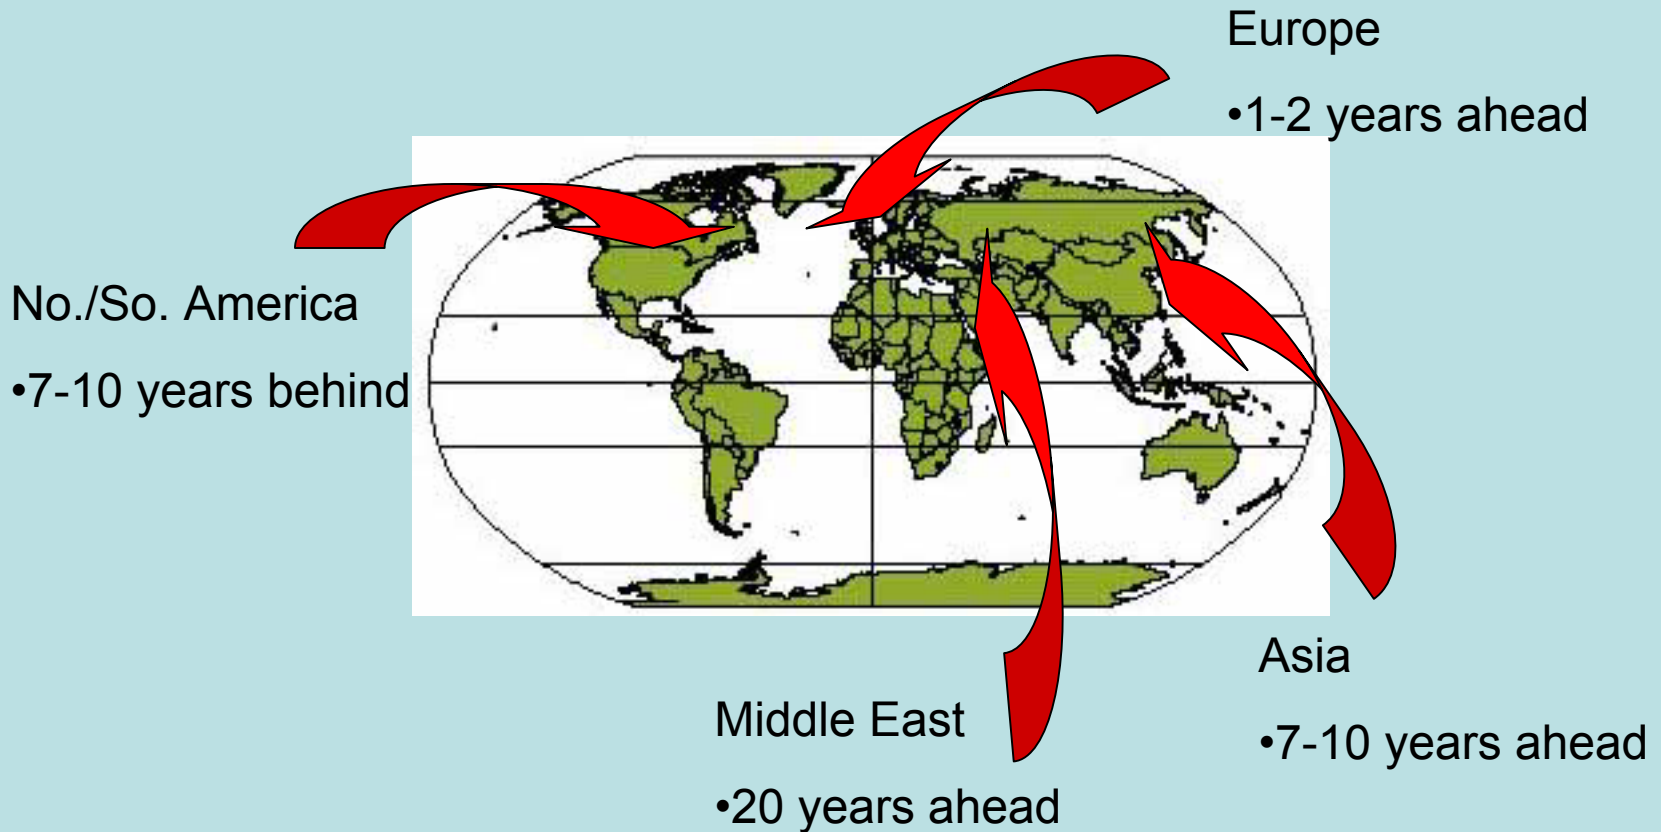

Intelligent Building Definition

An intelligent building is one where integrated systems, communications and controls cooperate to create a building and an infrastructure which provides the owner, operator and occupant with an environment which is flexible, effective, comfortable and secure

But...where are we vs. where we should be?

Source: Technology Roadmap for Intelligent Buildings

30k Foot View (Where We Should Be)

Q: What can we do today?

1. Break down financial barriers (life cycle costs.
2. Integrate and enhance the design/build process
3. Improve IBS reliability
4. Improve education and practices
5. Design seamless interoperability (that's why you are here!)
